

PRESS RELEASE 05 Dec. 03

Smooth Operators

Within weeks of acquiring the PEARSON range of potato machinery, manufacturing has commenced at STANDEN ENGINEERING ELY. Today the company celebrated as the first model of the first batch of PEARSON MEGASTAR de-stoners neared completion on the Ely factory production line.

The smooth transfer of production to Ely has been ensured as several key members of the team at Richard Pearson have joined STANDEN ENGINEERING, bringing with them a wealth of knowledge and experience of the PEARSON range.

STANDEN is currently expanding production facilities, as more PEARSON machines will be produced here. A staff recruitment drive is currently underway and recent orders from Japan, Sweden and around the UK are making future prospects look very bright for the company.

Pictured with the first Ely built PEARSON MEGASTAR left to right, Assembly Foreman Paddy Goad, Phillip Bryant and Mike Gray, Assembly Technicians. The PEARSON MEGASTAR in the photograph is destined for Japan.
