STANDEN-PEARSON

POWAVATOR ROTARY TILLER REVISIONS

The STANDEN-PEARSON POWAVATOR rotary tiller has been manufactured here at Ely since 2001 when we bought the designs and intellectual property rights from Dowdeswell. Various improvements have been made and new models introduced to keep POWAVATOR fresh and competitive, now we are delighted to bring you news about latest developments for the 2008 model POWAVATOR range.

All 2008 models will feature AUTO-RESET clutches to improve protection to drivelines, reflecting the increase in tractor power on the farm. As a result we are changing the model names and recommended maximum HP inputs accordingly. POWAVATOR 130 models will in future be known as POWAVATOR 150. Here is a summary of the latest 2008 model POWAVATOR 150 and 180 ranges:

STANDEN-PEARSON POWAVATOR ROTARY TILLER MODELS + 2008 SPECIFICATIONS

Model	Max' hp	Working width
150/70	170	1.80m (70")
150/80	170	2.03m (80")
150/90	170	2.29m (90")
150/100	170	2.54m (100")
150/120	170	3.05m (120")
180/120	200	3.05m (120")
180/140	200	3.56m (140")
180/160	200	4.06m (160")

Practically all POWAVATOR parts are manufactured at the STANDEN factory in Ely, including precision machining of gears and pinions, rotor shafts, body and headstock. Every SPEEDSET gearbox is carefully assembled by hand, skilled engineers check components and tolerances and every gearbox is run and tested to ensure reliability.

We are producing an all new 6-page colour brochure for the new POWAVATOR rotary tiller range and these will be available in 2-3 weeks time.

Meanwhile a downloadable version of the new POWAVATOR brochure can be found at <http://www.powavator.co.uk/>

Remember we are still manufacturing parts for many Dowdeswell powered cultivators.

Please don't hesitate to contact us for further information about this or any other STANDEN-PEARSON products.

Regards

Alex Mathias
