

PRESS RELEASE

19th August 2008

BEDFORMER BX Series – New for 2009

A new range of STANDEN-PEARSON BEDFORMERS will be available for the 2009 potato planting season. Featuring improved performance and easier adjustments for the operator, the new models will continue to be manufactured at the ELY factory where all blue STANDEN-PEARSON machines are produced. The updated range will be identified as the BEDFORMER BX Series.

NEW FRAMES

BEDFORMER BX 4-Bodied models benefit from a more modern, sleeker looking hydraulic folding frame with increased strength due to the use of higher specification materials. Neater markers fold rearwards, and spring loaded discs are now fitted to all models, helping create a more even soil mark for the driver to follow.

NEW LEGS

The optional AUTO-RESET MD leg is all new and features multi-directional (MD) break back abilities allowing it to break back in any direction should an obstruction be encountered. Resetting is fast, easy and automatic. SHEARBOLT leg design is also updated; and these feature a special grooved (waisted) shear-bolt design, complete with bushes to protect against wear.

TWIN NITROGEN ACCUMULATORS

Where AUTO-RESET MD legs are specified, a twin nitrogen accumulator system maintains pressure until the pre-set break back point has been exceeded. Importantly, the driver can adjust this setting to suit conditions, using just the tractor's hydraulics. No special tools are required.

NEW OPTIONS

Options for the new BEDFORMER BX Series include Adjustable Bed Finishing Plates. Suitable for CONVEX bodies only, the plates usefully help retain more soil in the bed on lighter soils. A special Stabiliser Blade for either STANDARD or CONVEX bodies can be specified to promote better stability on hillside work

The new updates applied to BEDFORMER BX (where applicable) will also be fitted to bed specification POWAVATOR rotary tiller machines manufactured by STANDEN-PEARSON for 2009. BEDFORMER BX joins MEGASTAR GEN-2 as part of the new STANDEN-PEARSON Potato Systems range for 2009, with more new products due to be launched in the coming months.

RETAIL PRICE – BEDFORMER BX, 2-Bodied model including depth wheels - £14719.00
